

## Selling or Buying a Business?

# Get your own verifiable Business Valuation now...

Business Valuation software is designed to provide an economical, efficient and effective business valuation. It combines relative indicators for future performance with basic financial data (Revenue, Variable and Fixed Costs) to value a business. By uniquely applying your intuitive business and market knowledge a 3 year performance forecast with sensitivity analysis, investment return, and a business valuation is calculated.

This proven software is used by 1000's of business owners/managers world wide who have benefited from its functionality and ease of use.

*"I have my own accounting firm and I must admit that I am very impressed ... IT IS  
OUTSTANDING."*

You can [purchase a Business Valuation software license right now](#) and build a verifiable forecast and valuation for your business within minutes...

Software is available as a standard spreadsheet (.xlsx file developed with Microsoft Excel) and will run on most spreadsheet applications. It includes an Input sheet for basic data and from this applies Sensitivity Analysis to calculate Expected, Optimistic and Pessimistic Business Forecasts with a Valuation Analysis for each. The example below demonstrates the layout, structure and outputs generated.

## What value is a Business Valuation when selling a business?

As a business seller you will gain verifiable independent and individual insight into the business value. This provides a strong platform for negotiation and strategic business insight to demonstrate the full potential of the business:

Business Valuation software:

1. Highlights the businesses current financial performance.
2. Forecasts the future business financial performance.
3. Allows business potential to be highlighted/demonstrated in financial projections.
